

# UpSchool

# 1-Day

# Workshop

UpSchool 1-Day Workshop provides F-10 teachers with an introduction to entrepreneurship education and develops the skills, content, and confidence required to teach entrepreneurship and plan entrepreneurship programs in their classrooms.

The first step to integrating entrepreneurial education into the classroom, UpSchool 1-Day is mapped to both the Australian and Victorian curriculums against critical and creative thinking capabilities. Over one school day, the workshop leads participants through three engaging sessions, including: an introduction to entrepreneurial thinking, startups, and planning. It has been designed for maximum educator engagement, flexibility in teacher involvement, and immediate real-life implementation.

UpSchool 1-Day serves as an introductory workshop and provides both inspiration and support to empower schools to begin integrating entrepreneurship into their schools. For schools wishing to engage with the full experiential learning model, Wade Institute's 3-Day program is designed as an in-depth series which takes participants from idea to execution.

Our UpSchool programs are built with flexibility in mind to ensure an appropriate fit to a school's timetable and curriculum requirements.

### Educators will:

- Learn the fundamental principles of teaching entrepreneurship
- Gain an understanding of the entrepreneurial mindset, why it is important, and how students can develop one
- Engage in a range of challenging and exploratory activities allowing them to step into the shoes of students and build their confidence in activity delivery
- Develop an understanding of the entrepreneurial journey and learn how to support students to set up high performance teams, ideate, problem solve, and engage in customer discovery
- Plan the implementation of entrepreneurship programs and/or workshops in their school
- Begin planning the implementation of entrepreneurship education in their school
